Frequency and Vibration hold a critically important yet hidden power to affect our lives, our health, our society and our world. The science of Cymatics proves that Frequency and Vibration are the master keys and organizational foundation for the creation of all matter and life on this planet. Music has a hidden power to affect our minds, our bodies, our thoughts, and our society. When that music is based upon a tuning standard purposely removed from the natural harmonics found in Sacred Numbers and the Fibonacci series of Nature, the end result may be the psychic poisoning of the mass mind of humanity. A nefarious alliance between The Rockefellers, The Third Reich, and a landmark Chicago musical instrument maker may have promoted the acceptance of a Western musical tuning standard totally disconnected from the science of Sacred Numbers to the detriment of Mankind. Despite its near universal adoption by the Western World, could the 440 Hz tuning standard actually promote war, disease, death? Might the most beautiful symphonies and melodies be covertly creating conflict and destruction throughout our world? "The 440 Enigma" provides the answers to these thought provoking questions, and sheds new light on how our current musical tuning standard -- A=440Hz -- came to be, and what it may mean to our world if we allow it to continue.
